Τραμπ: Τα αντιφατικά μηνύματα για τον πόλεμο στο Ιράν που προκαλούν... ζαλάδα, οι αυξήσεις των τιμών στην Αμερική και στο βάθος εκλογές (10/03/2026)

- *Ο Πρόεδρος Ντόναλντ Τραμπ και η κυβέρνησή του έχουν στείλει μπερδεμένα και αντιφατικά μηνύματα σχετικά με την κοινή στρατιωτική επιχείρηση ΗΠΑ – Ισραήλ κατά του Ιράν, δηλώνοντας πως ο πόλεμος «είναι σχεδόν ολοκληρωμένος», αλλά και «αρχή της οικοδόμησης μιας νέας χώρας».*
- *Έπειτα από ένα ταραχώδες πρωινό, τα χρηματιστήρια βυθίστηκαν και οι τιμές του πετρελαίου εκτινάχθηκαν, με τη μέση τιμή ενός γαλονιού βενζίνης στις ΗΠΑ να φτάνει τα 3,48 δολάρια.*
- *Οι ανησυχίες για το κόστος διαβίωσης και η σημαντική λαϊκή αντίθεση στη στρατιωτική εκστρατεία στο Ιράν αποτελούν ένα επικίνδυνο μείγμα για τον Τραμπ, ενόψει των κρίσιμων ενδιάμεσων εκλογών του Νοεμβρίου.*

Joint declaration of President Macron and Chancellor Merz.

(02/03/2026)

In the spirit of their close partnership as set out in Article 4 of the Treaty of Aachen, France and Germany have decided to enter into closer cooperation in the field of deterrence in response to the evolving threat landscape.

France and Germany have established a high-ranking nuclear steering group that will act as a bilateral framework for doctrinal dialogue and the coordination of strategic cooperation, including consultations regarding the appropriate mix of conventional, missile defence and French nuclear capabilities. France and Germany have agreed to take first concrete steps beginning this year, including German conventional participation in French nuclear exercises and joint visits to strategic sites as well as development of conventional capabilities with European partners. France and Germany will also increase their ability, as Europeans, to manage escalation beneath the nuclear threshold - in particular in the fields of Early Warning and Air Defense and Deep Precision Strike.

This Franco-German cooperation is based on the shared understanding that the nuclear dimension of deterrence remains a cornerstone of European security, relying on US extended deterrence, including US nuclear weapons forward-deployed to Europe, and on the independent strategic nuclear forces of France and the United Kingdom, which have a deterrent role of their own and contribute significantly to the overall security of the Alliance. This Franco-German cooperation will add to, not substitute for, NATO's nuclear deterrence and NATO's nuclear sharing arrangements, to which Germany contributes and will continue to contribute. France and Germany will continue to comply with their obligations under international law including the Treaty on the Non-Proliferation of Nuclear Weapons.

In light of their strong commitment to Article 5 of the North Atlantic Treaty and Art. 42 (7) of the Treaty on European Union, Franco-German cooperation aims at strengthening the systems of collective security both countries belong to. It aims at enhancing

Europe's security as a whole. Special attention will be given to coordination with the United States, the United Kingdom, other Allies and NATO.

China's economic statecraft has been exposed by US attacks on Iran and Venezuela. The US strikes raise questions over China's policy to forge energy and trade ties with US rivals. But in the long term, Beijing sees itself gaining diplomatic capital through a contrasting role as a stable and peaceful superpower.

Five Iranian football players granted asylum amid fears of persecution
(09/03/2026)

Five Iranian soccer players, who would likely have faced persecution if they returned home after their Women's Asian Cup campaign, have been granted asylum in Australia. There had been growing fears the women, who were labelled "traitors" on Iranian state TV for not singing the national anthem before a game, would face persecution at home. Prime Minister Anthony Albanese says he is willing to provide assistance to other women in the team if they want it.

Closing the Gap: Europe's Challenge to Rebuild Land Forces
(10/03/2026)

- *European land forces are rebuilding after decades of underinvestment, yet significant capability gaps are likely to persist until at least 2030. This report assesses three capability shortfalls in the Netherlands, Germany, Sweden and Denmark*
- *Although defence spending is increasing, progress remains constrained by limited defence-industrial capacity, lengthy procurement cycles and persistent personnel shortages*
- *In the absence of a coherent long-term strategy, Europe will remain reliant for critical capabilities such as long-range air defence and rocket artillery on non-European suppliers, as the United States and Israel*
- *Europe possesses the industrial and technological base to address these challenges, but doing so will require sustained political will, a coherent industrial strategy and deeper military cooperation*
